

Robust grapples for efficient handling.

The G and GA grapple models are ideal for working with excavators from 11 to 90 tonnes.

As for the GP grapple, they are designed for excavators from 6 to 10 tons and for truck cranes from 8 to 24 T/m capacity. They integrate the cylinders within the tines.

With their reinforced tines and protected cylinder rods, the grapples are particularly resistant to even the most extreme working conditions.

This excellent strength can be shown through the improvement of the articulation pins by:

- ✓ High Frequency pins Hardening.
- ✓ Ringed joints.

The entire range offers steel frames with High Elastic Limit (HLE), as well as replaceable cast steel teeth for quick and easy maintenance.

Benefits

- ✓ Robust and reliable.
- ✓ Easy maintenance.
- ✓ GA452A with casted tines only for the model $\varnothing$ 2 000 mm.
- ✓ Available in 3, 4 or 5 tines.
- ✓ Customizable types of tines : up to 4 core types depending on the application.
- ✓ The rotation benefits from a gear driven motor.
- ✓ Hose protection or full protection cage as standard.

Options :

Reinforced tines or core depending on use only for GA452
Safety valve on cylinders for GA452, GA550, G7082.

Suspension links

N078M Standard

Only for :
- G0951
- GA452A

Other standard

Quick release

Automatic
