

ATR CONTROL SYSTEM

2LP

FEATURES :

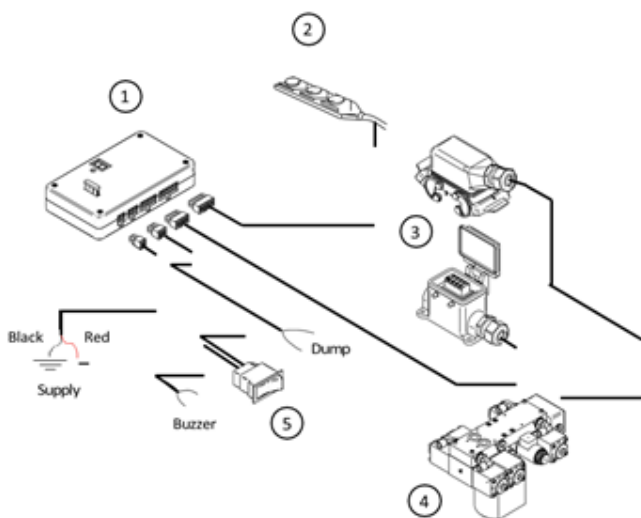

This control system is used to **add and switch functions** without modifying the machine **or add a complexe control system**.

Thanks to **its proportional lines** your machine will gain in **flexibility**. The use of your ATR will therefore will be **smooth and efficient**.

This control system will make it possible to combine **two functions** of your **ATR**, **Rotation/Tilt, Rotation/Hydraulic tool, Rotation/ Quick Hitch**.

ADVANTAGES :

- Easy to set up, no PC required for installation and maintenance.
- Fluid and precise control thanks to the proportional circuits of the machine.
- Supplied with its electrical harness.
- Can combine two functions simultaneously.
