

# RETRO BUCKET QUARRY USAGE

## *Robust buckets for intensive use*

The quarry bucket are designed to work with excavators from 12 to 150 tons.

Suitable for the extraction and loading of abrasive materials, these buckets are equipped with a double bottom for intensive applications.

## Standard and T profile

Arden Equipment offers 2 profiles:

- ✓ the standard profile designed for earthmoving and loading.
- ✓ the T-profile make it easier to handle blocks because of its advanced blade and its notched sides.

## Characteristics

- ✓ Adaptable for excavators from 12 to 150 tons.
- ✓ Compatible with QA / UA / AECW / AES / AT /ATR / AIO quick couplings.
- ✓ Optimum penetration and filling.
- ✓ Anti-abrasion steel 450 HB.
- ✓ Original manufacturer kinematics.
- ✓ Bucket stability for quick and easy pick up.
- ✓ Available with Arden teeth.

**Robustness**

**Compatibility**

**Versatility**

**Safety**

## Options :

### Reversibility

The reversibility option is possible for buckets with QA, AECW, AES, UA mountings.
