

RETRO BUCKET GENERAL USAGE

Robustness and safety for general purpose retro buckets.

The General Purpose Retro Bucket (UG) models are designed to work with excavators from 12 to 37 tonnes.

They are intended for earthmoving in soft and medium hard materials such as clay or earth. They are equipped with standard Arden Equipment teeth.

Standard profil

Arden Equipment presents the standard profile designed for earthmoving and loading.

Characteristics

- ✓ Adaptable for excavators from 12 to 37 tons.
- ✓ Available with QA / UA / AECW / AES / AT /ATR quick couplings.
- ✓ Optimum penetration and filling.
- ✓ Respect of the original kinematics manufacturer.
- ✓ R30 and R40 equipped with transport hooks on the straps.
- ✓ Bucket stability for quick and easy recovery.
- ✓ Available with Arden teeth.
